

## PREPARING SAT IN 6 MONTH

WEEK 1: START THE PROCESS BY TAKING A FULL-LENGTH (UNTIMED) PRACTICE TEST TO GET A BASELINE SCORE FOR THE EXAM.

This first practice test will give you a vibe for how the test is designed, what kind of inquiries are posed in each segment, and give a superior comprehension of where you are beginning (qualities and shortcomings). Don't hesitate to take this training test in areas... don't surge!

WEEK 2: SCORE AND BREAK DOWN THE DATA TO FIND STRENGTHS AND WEAKNESSES.

Think about: Primary highlights of the test, Qualities (questions you got right), Shortcomings (questions you got off-base), Sorts of inquiries that were befuddling, Answer decisions that confounded you during the test, Make notes (in detail) of things that you have to study and zones where you have to survey.

WEEK 3: ONCE YOU HAVE AN UNDERSTANDING OF YOUR STRENGTHS AND WEAKNESSES, TAKE A SECOND PRACTICE TEST.

This time follow the time prerequisites. For instance, the SAT Math segment is 80 minutes long, take that particular area and time the procedure. Rehash this arrangement for every territory of the test; separate each planned area and complete the full test over the range of seven days.

WEEK 4: SCORE THE "Planned" TEST AND BREAK DOWN THE DATA TO FIND STRENGTHS AND WEAKNESSES WHEN IT COMES TO QUESTION TYPES.

Check whether you committed any extra errors when you needed to factor in the time restrictions. Consider: Did you commit indiscreet errors? Did you commit errors dependent on the configuration of the test? Did you commit any new errors dependent on the substance of the test due to the time limitations? Make notes (in detail) of things that you have to study and zones where you have to survey.

MONTH 2-3: STUDY THE QUESTIONS

Since you have a superior comprehension of the test... the time has come to contemplate the inquiry types! Take each segment of the test and start to plunge into the territories where you battled. Audit the inquiries you got off-base, concentrating on blunders and substance associated with those kinds of inquiries. Audit, invigorate and acquaint yourself with each branch of knowledge.

MONTH 4: PRACTICE TEST AND DATA ANALYSIS-CYCLE 2

WEEK1: TAKE ANOTHER TIMED PRACTICE TEST.

Attempt to make this test mirror the real testing condition however much as could reasonably be expected. On the off chance that the test is 3 hours and 50 minutes with a 15-minute break, emulate the testing condition as intently as could be expected under the circumstances.

## WEEK 2: ANALYZE THE TIMED PRACTICE TEST

At the point when you break down the coordinated practice test, take a gander at the substance materials where you battled and on the off chance that you had any planning issues. While dissecting the inquiries you got off-base.

## WEEK 3-4: PINPOINT YOUR WEAKNESSES

Pinpoint your shortcomings with this training test and separate those components... once more. Take a gander at each test question as follows:

Improving outlook: survey addresses you got inaccurate and center around fixing the blunder  
Upgrading attitude: study the inquiries you got option to improve speed and productivity

## MONTH 5: STUDY

Keep on examining your coordinated practice test and better comprehend shortcomings when managing content. Keep on building information on the tried materials in each substance zone and include testing techniques.

TESTING STRATEGIES: Work on wiping out wrong answer decisions, Search for the inaccurate responses to help locate the right one-Process of end, settling on 2 "great" answer decisions. There are times when two answers look right figure out how to pick the right answer, Work on discovering proof from the perusing section to respond to questions

## MONTH 6: PRACTICE TESTS AND DATA ANALYSIS-CYCLE 3

### WEEK 1:TAKE ANOTHER FULL-LENGTH TIMED PRACTICE TEST.

Make this test emulate the real testing condition however much as could reasonably be expected. This will be your last full length coordinated practice test, so make the most of it.

### WEEK 2:SCORE THE TEST AND REVIEW YOUR ANSWERS.

Concentrate on any very late issues that may introduce themselves. Make note of any inquiry types as well as test-taking procedures that may require more consideration.

### WEEK 3-4:IRON OUT ALL OF THE MINOR KINKS.

Take these most recent fourteen days to resolve the entirety of the minor crimps. Take your third "Practice Test and Data Analysis Cycle" and ought to be utilized to address just little concerns. You are toward the finish of the examination plan and prepared to assault the test with certainty and assurance.
